Arief Mahdali – Head of General Affair -APP Serang Mill in a group photo to celebrate the official start of constructing Lamipak’s second aseptic packaging factory in Cikande, Serang Regency, Banten, Friday (20/5/2022) Lamipak.

SERANG, INDONESIA – May 20, 2022 – Lamipak, one of the industry leaders in providing high quality products and solutions in aseptic packaging, officially kicked off the construction of its second factory in Indonesia. The factory will not only be Lamipak’s first factory expansion overseas, but will also become the first of its kind to be producing aseptic packaging in the country.

Conveniently located near Cikande in Serang district, 65 km to the west of Jakarta and within 5 minute access to the toll road that can expedite transportation of cargo to the sea port; the factory will be built on a land space spanning a surface area of 165,200 square meters and have a production floor space of 55,079 square meters.

Inside, the factory will be equipped with world class machinery that adheres to Industry 4.0 allowing it to be the most advanced and connected factory that Lamipak has ever built. Design to have a capacity of 18 billion packs per annum, the production line will be implemented in two phases with the initial part to have it ready to commercially produce up to 9 billion packs by the 4th quarter of 2023. Once the final phase is complete, the factory’s capacity will be one of the biggest in the world.

Following our continuous efforts on sustainability, the factory will also be installed with solar panels on its rooftop and abide to LEED Gold certification. The equipment itself will also be energy efficient with plans to have it designed to meet LEED Platinum, the highest standard that can be awarded from the association for leadership in energy and environmental design.

Ratu Tatu Chasanah, Head of Serang District, expressed her appreciation to Lamipak Indonesia for investing US\$ 200 million to build an aseptic packaging factory in Serang Regency, Banten by commenting, “We (the Serang District Government) are ready to support the Lamipak aseptic packaging factory project. The Serang District government will support the construction of the Lamipak factory because it will provide many benefits for Indonesia, especially for the people in Serang District, such as job creation and being able to grow micro, small and medium enterprises.”

Anil Kaul, Vice Chairman of Lamipak, said: “To serve our strong and fast growing customer base of aseptic packaging. Lamipak will expand its capacity in Indonesia up to 18 billion packs in 2 phases with an investment of 200 million USD by 2024. The core mission of our expansion is also to become a global leader in the food and beverage packaging industry by being a one stop solution provider through offering lowest carbon footprint products.”

Kostiantyn Sinikov, Managing Director of Lamipak Indonesia, commented: “Our team is proud and excited to be involved in this project. Once the factory is commercially ready it will set a high benchmark on what a world class packaging facility should be and will deliver high class service both to the local and export customers. In addition, its presence will bring benefits to the local communities and their business as well as create new job opportunities in the area.”

About Lamipak

Established in 2007, Lamipak is one of the industry leaders in providing high quality products and solutions in aseptic packaging. In order to meet the needs of our customers and build a strong partnership, we focus on providing sustainable and safe packaging while also ensuring comprehensive solutions and services. Since our establishment, Lamipak has evolved and grown to serve customers in over 60 different countries around the globe.
