

# The FSC® Certificated Lamipak Packaging

As a responsible aseptic packaging solutions provider, Lamipak is continually increasing its efforts in sustainability by sourcing its paper based raw materials from sustainable forest resources. One of the solutions in ensuring our raw materials is managed responsibly is to source from forests approved by FSC®.

The Forest Stewardship Council (FSC®) is an international non-profit, multi-stakeholder organization established in 1993 that promotes responsible management of the world's forests. Reputed as the most rigorous, credible forest certification system, purchasing products that is certified assures the products our customers receive are sourced from forests that achieves their vision of meeting “current” needs for forest products without compromising the health of the world’s forests for future generations”.

The FSC®'s stated mission is to "promote environmentally appropriate, socially beneficial and economically viable management of the world's forests" which is also consistent with Lamipak’s mission in being “Environment-friendly”. Lamipak was certified by the FSC® two years ago under the code FSC-C149017 which ensures that our paper based raw materials originates from a sustainable source.

Lamipak’s commitment is continually improving the percentage of FSC® certified raw material in products, which not only paves the way for more sustainable packaging in the short term, but also in the years to come.
